Representation and Reasoning over Longitudinal Clinical Trajectories from Structured Data and Text

Shahriar Noroozizadeh

Nov 6, 2026

Carnegie Mellon University
Pittsburgh, Pennsylvania 15213

Thesis Committee:

George H. Chen (Co-Chair)
Jeremy C. Weiss (Co-Chair)
Zachary C. Lipton
Vaishnavh Nagarajan

Submitted in partial fulfillment of the requirements
for the degree of Doctor of Philosophy
in Machine Learning and Public Policy.

Abstract

PLACEHOLDER
The dissertation abstract has not been written.

Table of Contents

List of Figures

List of Tables

Chapter 1

Introduction

PLACEHOLDER

Placeholder for the introduction. No dissertation introduction has been written.

Part I
Learning from Structured Longitudinal Clinical Trajectories

Chapter 2

Temporal Representation Learning

PLACEHOLDER

Temporary placeholder. The selected paper and its scientific abstract have not been migrated.

Part II
Causal Inference from Longitudinal Clinical Data

Chapter 3

Medication Adherence and Causal Modeling of Longitudinal Clinical Outcomes

PLACEHOLDER

Temporary placeholder. The selected paper and its scientific abstract have not been migrated.

Chapter 4

Heterogeneous Treatment Effects under Censoring: SurvHTE

PLACEHOLDER

Temporary placeholder. The selected paper and its scientific abstract have not been migrated.

Part III
Recovering and Reasoning over Clinical Trajectories from Text

Chapter 5

The Textual Time Series Framework / PMOA-TTS

PLACEHOLDER

Temporary placeholder. The selected paper and its scientific abstract have not been migrated.

Chapter 6

Reconstructing Sepsis Trajectories from Clinical Text

PLACEHOLDER

Temporary placeholder. The selected paper and its scientific abstract have not been migrated.

Chapter 7

Forecasting Clinical Risk from Textual Time Series

PLACEHOLDER

Temporary placeholder. The selected paper and its scientific abstract have not been migrated.

Chapter 8

Aligning Textual Trajectories with Structured EHR Data

PLACEHOLDER

Temporary placeholder. The selected paper and its scientific abstract have not been migrated.

Chapter 9

Verification and Decision-Making from Textual Sepsis Trajectories

PLACEHOLDER

Placeholder for the proposed verification and decision-making work. No scientific proposal text has been written.

Chapter 10

Discussion and Conclusion

PLACEHOLDER

Placeholder for the discussion and conclusion. No scientific synthesis has been written.

Appendix A
Temporal-SCL

PLACEHOLDER

Temporary placeholder for an existing paper appendix or supplement. No supplementary scientific content has been migrated.

Appendix B
Medication Non-adherence

PLACEHOLDER

Temporary placeholder for an existing paper appendix or supplement. No supplementary scientific content has been migrated.

Appendix C
SurvHTE-Bench

PLACEHOLDER

Temporary placeholder for an existing paper appendix or supplement. No supplementary scientific content has been migrated.

Appendix D
PMOA-TTS

PLACEHOLDER

Temporary placeholder for an existing paper appendix or supplement. No supplementary scientific content has been migrated.

Appendix E
T2S2 CHIL

PLACEHOLDER

Temporary placeholder for an existing paper appendix or supplement. No supplementary scientific content has been migrated.

Appendix F
T2S2 AAAI

PLACEHOLDER

Temporary placeholder for an existing paper appendix or supplement. No supplementary scientific content has been migrated.

Appendix G
Textual–Tabular Alignment

PLACEHOLDER

Temporary placeholder for an existing paper appendix or supplement. No supplementary scientific content has been migrated.

Bibliography

PLACEHOLDER

The unified bibliography will be populated from the selected manuscripts during their approved migrations.

Temporary page!

LaTeX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.
If you rerun the document (without altering it) this surplus page will go away, because LaTeX now knows how many pages to expect for this document.
